"Purification, amino acid sequences and assay cross-reactivities of
porcine insulin-like growth factor I and -II.";
J. Endocrinol. 122:681-687(1989).
-I- FUNCTION: The insulin-like growth factors possess growth-promoting
activity. In vitro, they are potent mitogens for cultured cells.
IGF-II is influenced by placental lactogen and may play a role in

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
